Microsoft  
Sustainability Manager

**USD 4,000**  
per tenant, per month<sup>1,2</sup>

Microsoft Sustainability Manager solution

Dedicated customer support<sup>3</sup>

Microsoft Cloud for Sustainability data model

<sup>3</sup> **Technical support:** Get a response to your most critical cases within one hour and unlimited access to technical resources.

## Key capabilities at general availability (GA), June 1, 2022

### Record

- Increasingly automated data collection with prebuilt connectors
- Centralized emissions data from disparate sources
- Prebuilt methodologies to calculate GHG emissions across Scopes 1, 2, and 3<sup>4</sup>

### Report

- Data analytics, visualization, and dashboards
- Actionable insights and performance tracking
- Configurable preparatory reports

### Reduce

- Scorecards and goal setting
- Seamless collaboration with Microsoft Teams<sup>5</sup>
- Integrated sustainability insights

For latest localization and regional availability, please visit:  
<http://aka.ms/SustainabilityGeoAvailability>

<sup>1</sup> Above pricing includes capabilities launched for GA; additional post-GA features may be subject to additional charge.

<sup>2</sup> License includes Dataverse entitlement capped at: Database (10GB), File (20GB); Log (2GB). Additional usage will require purchase of Dataverse capacity add-on.

<sup>4</sup> Microsoft Sustainability Manager has the ability to store and report on emissions across Scopes 1, 2, and 3. The solution includes prebuilt calculation methodologies for Scopes 1 and 2 and several categories of Scope 3 at GA. Prebuilt calculation methodologies will be added in future updates for remaining Scope 3 categories. For more information, please visit [Legal information page](#).

<sup>5</sup> Microsoft Teams collaboration and chat is currently a preview feature. Collaboration capability requires Microsoft Teams license.
